ABOUT COMPANY

One of the **Leading**
Engineering (EPC) Company
in **Bangladesh**

About Us:

- Is a Private company which is a pioneer in the energy sector with a vast experience of 6 years since 2016 in Bangladesh.
- Is one of the leading, adroit and experienced companies with tremendous potential.
- Is one of the leading infrastructure construction companies in Bangladesh with business involving pipe line construction, Mechanical construction and Civil infrastructure.
- Is a company of strong safety culture.
- Has a corporate governance in business ethics, health, safety and community affairs.
- We do the Engineering, Procurement and Construction (EPC) works.

BUSINESS FOCUS

Engineering:

Consultancy
Design with calculation
Drawing with 3D view

Oil & Gas:

Pipelines (Fabrication, modification and Tie in works) in NG, LPG and SNG sector.
Installation & Commissioning of LPG storage tank, Pump and Pipeline.

SNG System

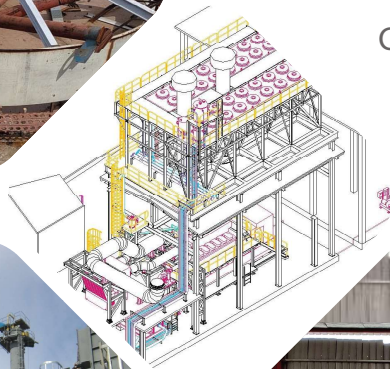

Construction: Tanks

Process Plant:

Refineries
Petrochemicals

Power Plant:

Fabrication of pipe line
Installation of Machinery
Commissioning of the Plant

OUR PRODUCTS

- Ventilation Fan
- Heat Exchanger
- Cooling Tower
- Radiator
- Boiler
- Economizer
- LPG Vaporizer
- LPG Regulator
- LPG METER
- LPG Tank
- LPG Dispenser
- LPG Pump

PARTNERS TO WHOM WE ARE IN TOUCH

Almost in every project we found our these beloved partners till accomplishment of the project and their presence really boost our quality of work.

Concept of conversion into synthetic Natural gas (SNG) Newly Innovation

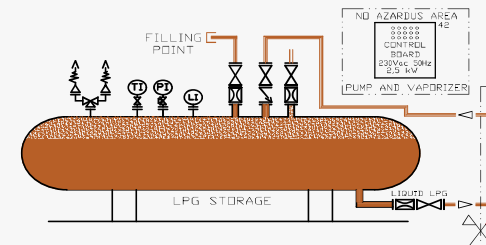

The advantages of interchangeable gas distribution compare single energy source. The availability of an interchangeable gas (interchangeability is given by a mixture ratio that provides as the primary gas) offers gas distribution companies and the ability of distributing a gas mixture as an alternative to, or in a

On the field, this option means:

- Reducing strategic dependence
- Increasing bargaining power
- Managing the "cut" of consumption peaks (or containing consumption peaks not included in contracts)
- Covering peak demand

An example is the distribution of #SNG (Synthetic Natural Gas), a mixture of LPG (Liquefied Petroleum Gas) and regulated air to provide the same Wobbe Index as natural gas.

- by distributing SNG, where natural gas is not available, gas distribution companies anticipate delivery of natural gas;
- by distributing SNG as an alternative to natural gas, gas distribution companies reduce economic and strategic dependence on natural gas;
- by distributing SNG, in addition to natural gas, gas distribution companies cover peak demand;
- by distributing SNG instead of LPG in cylinders or small tanks, gas distribution companies enable their customers to operate more efficiently, reduce pollution and increase safety.

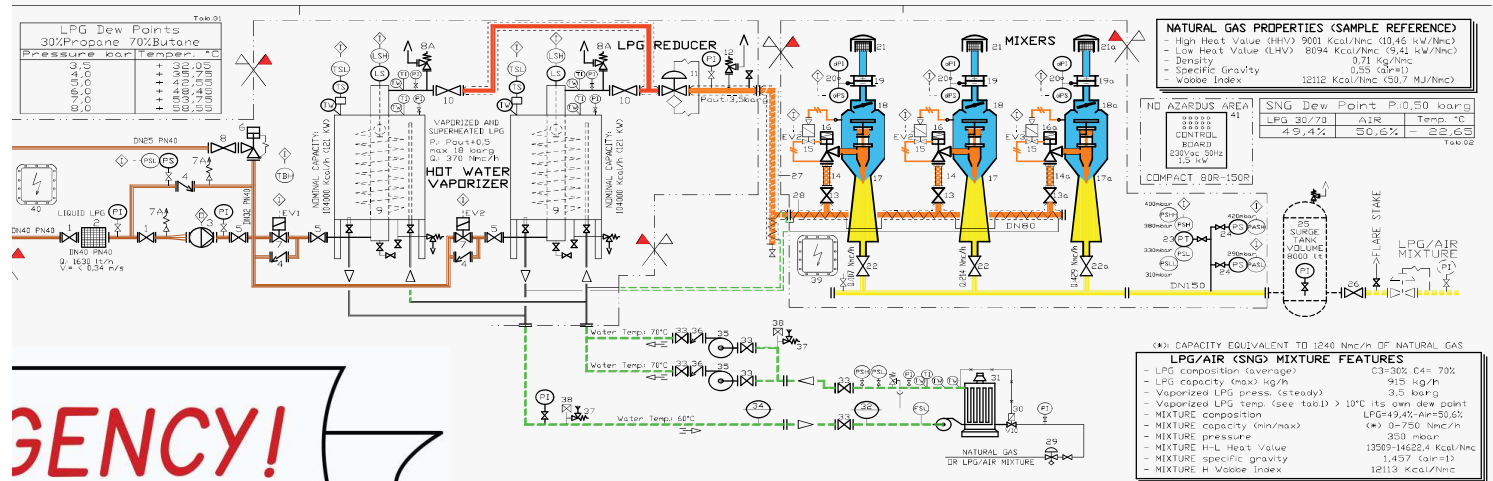

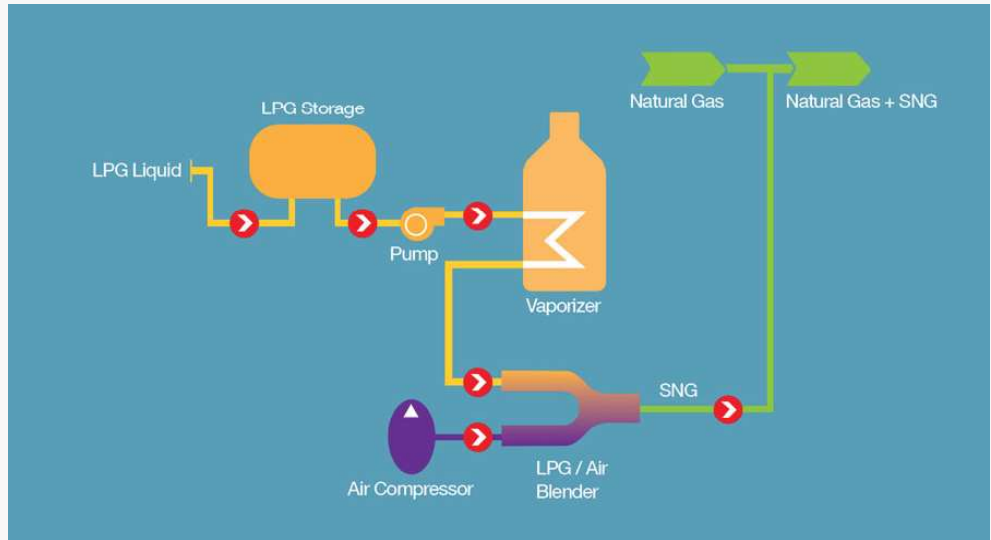

GAS EMERGENCY

BECOME AUTONOMOUS OVER THE CRISIS

By mixing AIR + LPG, CAM technology produces clean energy source (NATURAL GAS) product with **INCREDIBLE ECONOMIC**

... to the distribution of a gas mixture with a primary... es the same Wobbe Index... energy operators the possi... addition, a primary gas.

AGENCY!

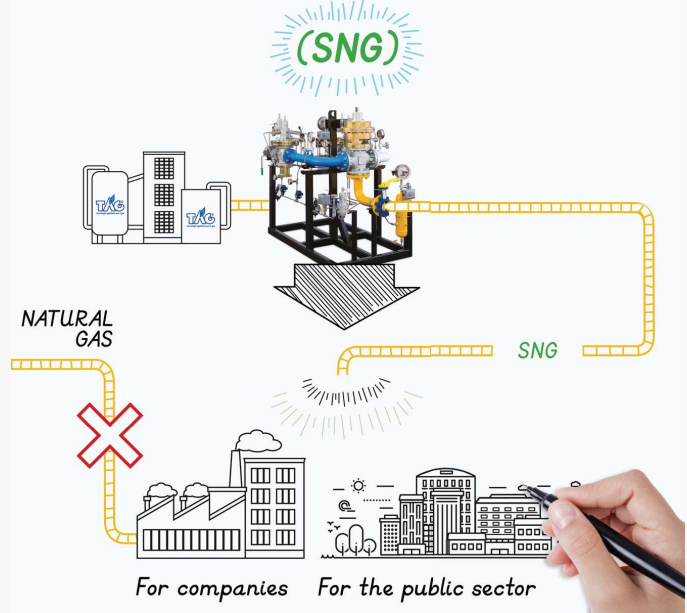

... AND GET WITH SNG!

CAM technology replaces gas without having to carry out important structural changes, producing clean energy obtained from alternative sources.

replaces the current... ing clean energy (SNG)
ADVANTAGES.

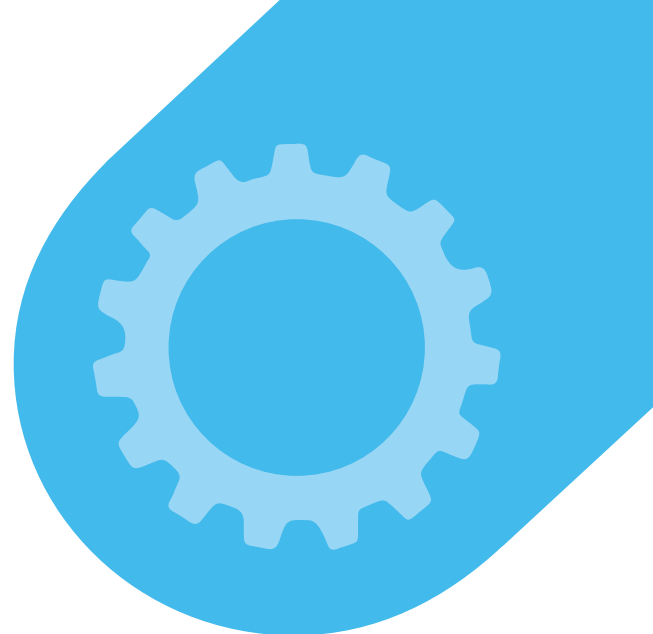

SYNTHETIC NATURAL GAS (SNG)

BELOVED CLIENTS

We are really happy to work with our clients and much more happier as we have ensured their needs as we have committed.

- JOTUN PAINT
- TOTAL GAS
- UNIGAS
- MGI
- ARLA FOOD BANGLADESH LTD.
- SINGER BANGLADESH LTD.
- KOHINUR CHEMICAL LTD.

- OMERGA GAS ONE
- FARIHA KNIT TEX LTD.
- MYMUN COMPLEX (DBL GROUP)
- DELTA LPG
- FOOD PANDA

MILESTONES

SINHA GROUP

Fire Fitting Total Solution with MK

BARAKA POWER PLANT

Design, Engineering, Supply of BOPs, Installation, Testing and Commissioning of 100MW HFO Base Power

ZODIAC POWER PLANT

Design, Engineering, Supply of BOPs, Installation, Testing and Commissioning of 50MW HFO Base Power plant.

CONFIDENCE POWER

Design, Engineering, Supply of BOPs, Installation, Testing and Commissioning of 100MW HFO Base Power

MEGHNA PVC LIMITED

Mechanical Erection, Fabrication & Piping works

KSRM POWER PLANT

Design, Engineering, Supply of BOPs, Installation, Testing and Commissioning of 60 MW CPP.

CONFIDENCE POWER

Design, Engineering, Supply of BOPs, Installation, Testing and Commissioning of 10 MW CPP.

ARLA FOOD BANGLADESH LIMITED

Under Ground Diesel Storage Tanks Design, Supply and Installation (EPC) Works

FOOD PANDA

LPG Networks attached with TOTAL GAS

SHELTECH

LPG Net works with metering System attached with UNIGAS

FARIHA KNIT TEX LTD.

LPG Tank System works for Boiler operation

MYMUN COMPLEX (DBL GROUP)

LPG Tank System works for Boiler and Industrial machine operation

OUR PHILOSOPHY

SAFETY

Safety is our business from executives to the front line worker, it starts and stops with us, it is one of our core values.

QUALITY

Provide best in class end to end engineering solutions, add value to those we associate everyday to move beyond borders.

YES

We are always "YES" to our customer need. We take responsibility for what we DO.

Safety:

Quality Engineering & Quality Infrastructure both are committed to ensure the health and safety of its employees, clients and business associates and holds the highest priority in case of any safety issue. We conduct our business in such a manner that ensures safety at work and safeguards the environment in which we have to conduct our Projects. We have a safety manuals that followed by every employee. Company has its own HSE policy to adopt clients safety requirement. Besides, we provide the safety training to our employees that improve the commitment among employees for safe working conditions and practices on the job.

Our Management considers the safety and health of its employees and environment protection to be one of its greatest responsibilities and an integral part of its business.

SYNTHETIC NATURAL GAS
(SNG)

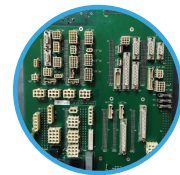

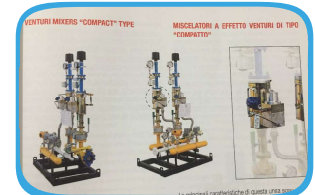

VARIABLE VENTURI MIXERS
COMING SOON

- ▶ fixed flow rate
- ▶ mixture outlet pressure up to 500 mbar
- ▶ mixing ratio highly stable
- ▶ gas / air ratio easily adjustable
- ▶ fail-safe design

- ▶ variable flow rate from 5% to 100% of nominal capacity
- ▶ mixture outlet pressure: from 1 to 5 bar
- ▶ high control accuracy of outlet pressure
- ▶ fast and prompt response to the change in consumption
- ▶ gas / air ratio easily adjustable
- ▶ fail-safe design
